

# Teammate grading form

In the spaces below please fill in letter grades (A+, A, B+, ..., F) for each of your group project teammates *and yourself* in random order and very briefly explain why you are giving them that grade. This should be anonymous, so please do not indicate who you are in any way. No one wants to know. ;)

Group number or name: BUBBLE Cha

| Name               | Grade (A+ to F) | Explanation  |
|--------------------|-----------------|--|
| Kristina Danilenko | B               | Not very present member in the group chat or for ideas, but did her part of the work when solicited.   |
| Camryn Foppe       | A               | Present overall, did her part, and for the last submission, tried to bridge the gap in communication between all members and Varvara (who created a new document without telling anyone at first, which led to many members working on the old version for lots of time :/)  |
| Alix Hegewald      | A               | Built group chat, initiated conversation and meet-ups, did her part of the work.<br>Pinpointed the lack of why in the initial walkthrough scenario.<br>A bit confused by the double document situation at the end, worked for a long time on the previous one before noticing.   |
| Vanesa Magana      | A+              | Provides ideas for the group work.<br>Very good moderator all the while. Still positions herself when necessary (when her paragraph got deleted for example by Varvara with no warning, or when defending the team member that was aimed at with the impolite remark. Did all her work.                                |
| Varvara Svorob     | B-              | Good suggestions, good reflexes, active member, but very rushed and bad group communication which in fact greatly reduced group efficiency. Good worker/ bad teammate combo in short (both in terms of organization as well as certain impolite remarks regarding a teammate (to which she apologized later however)). |
|                    |                 |  |
|                    |                 |  |
|                    |                 |  |
